PRATHAP SWAERO'S KNIFE SAVES LIFE

GANDHI HOSPITAL

The Long Journey of A SWAERO-SURGEON

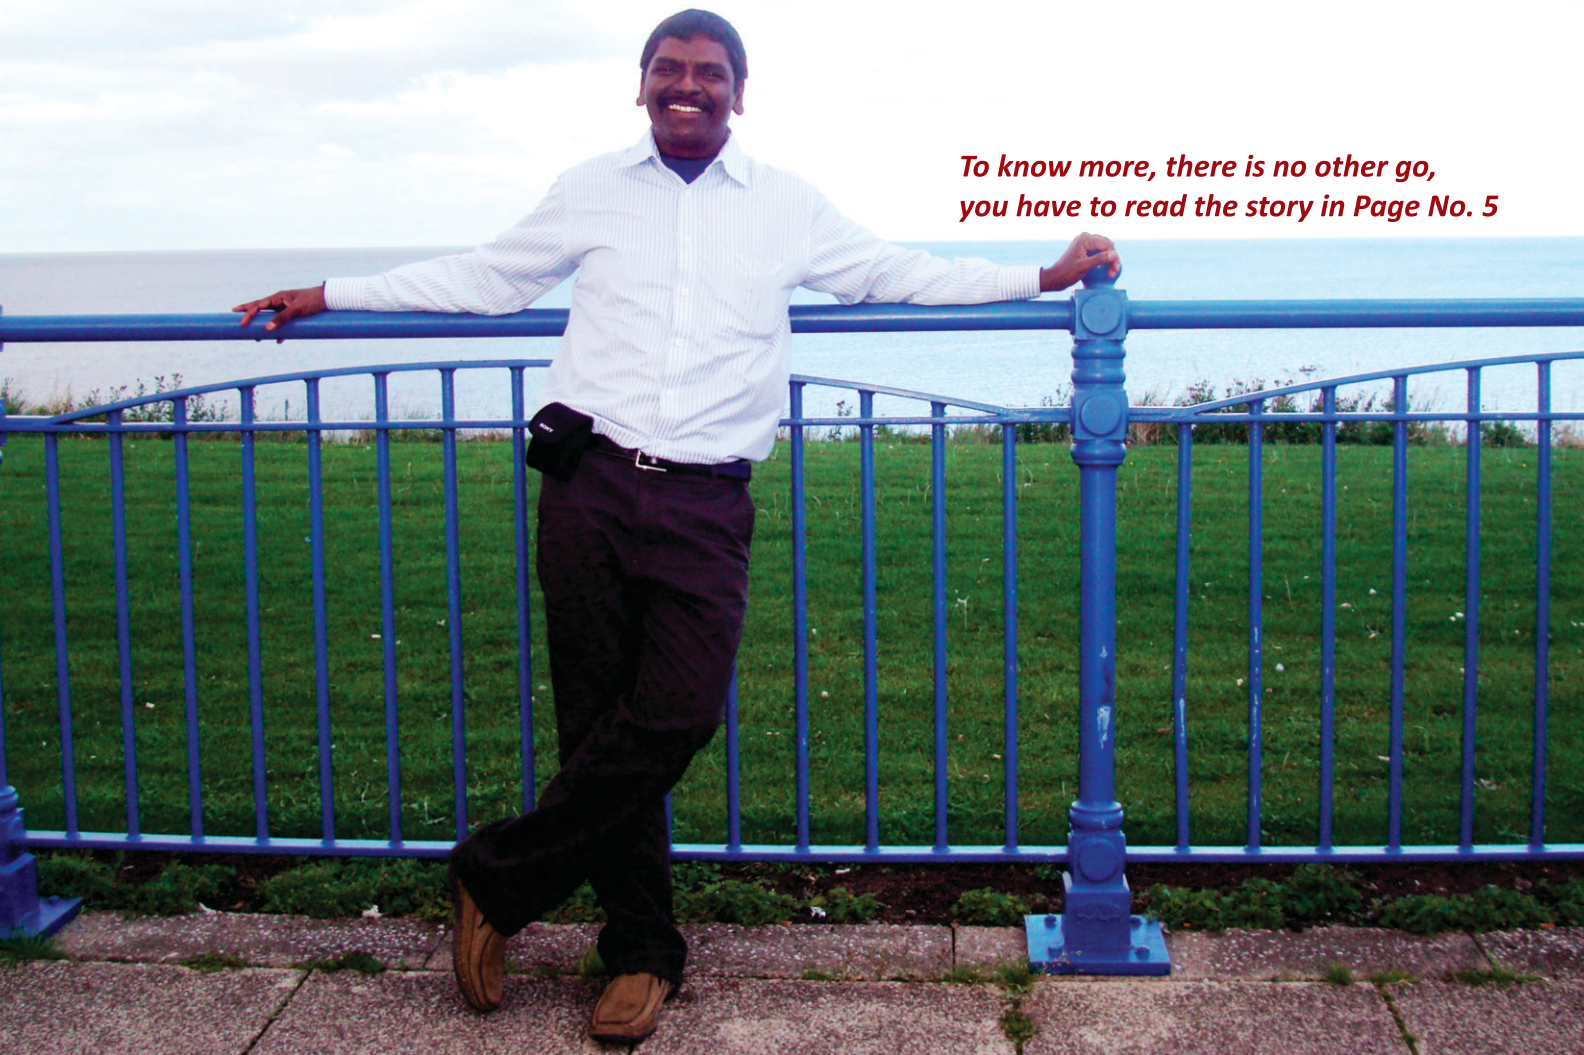

With Prof. Atul Goel, Noted Indian Neurosurgeon

With Prof. Majid Samii, Distinguished Iranian Neurosurgeon

Wishing to become a doctor is neither an unusual idea, nor an unattainable goal. What if what social background you belong to? What if which government school you study in? It is a perfectly practicable idea if you are free from unnecessary apprehensions and complexes. Apprehensions kill your instinct. Complexes kill your curiosity. If you are confident of yourself, the 'best out of you' comes out. Especially, when you have the support of your parents, teachers, you can do any miracle under the sun to prove yourself. That is what was done by one of our amazing Swaeroes, Dr. Nandigama Prathap Kumar from Nalgonda. He comes from poor, marginalized community. His parents are from agriculture background. They wished he were a doctor. That is all. With refreshing mind he swore to become a doctor for which he just spared all of his energy and time and cared for studies. As everyone stared at him, he realized the dream of his parents and became a doctor. Not an ordinary doctor.....!!

***To know more, there is no other go,
you have to read the story in Page No. 5***

From the Editor's Desk...

Dear Swaeroes,

At the very outset, I would like to congratulate you all on making IMPACT a grand success. It is good that you had a nice time with your family members and turned up to schools right in time.

But, let me also share a painful experience faced by me as a member of the editorial team. The visionary Secretary, with a noble purpose of inculcating good reading habits among you, launched this unique journal and a lot of striving goes behind each and every issue. But, alas! Some schools seem to be safely confining the bundle to the cupboard which means that the reading of journals and newspapers is grossly neglected. If that is the case, you would be greatly disappointing us. A lot of effort is put into every edition right from collecting information, designing, printing, to dispatching them to every institution. Every story of alumni is inspirational in its own way and we wish that you fully make use of them to emulate yourselves. We also request for the ample contributions of articles from both the students and teachers.

And to talk about this issue, we have the success stories of Dr. Prathap, a noted neurologist in Gandhi Hospital, Musheerabad and of Dr. Pawar, a technical officer in IICT, Tarnaka. The Swaero-authors winner, Raju Swaero shares us success in life and fiction. And we also have an account of best teachers who brought laurels to the Society. Do not miss to read any one of them. To fully energize yourself, keep reading 'Secretary speaks'.

Happy reading!

Thummuri Sharath Babu

You are all requested to send your contributions to the new mail contentmanagers@gmail.com hereafter.

This Swaero Dispels the Fallacy

The historic Gandhi Hospital located in the heart of Secunderabad looks like a colossal palace. The hospital with 150 years of service to the poor has a sprawling campus, with rows of pruned croton plants all around. Through the main gate I entered the building in which there are hundreds of rooms. Navigating through the corridors, I found the chambers where Dr. Nandigama Prathap Kumar was busily engaged testing patients. The patients, who turn up to government hospital, as you all know, are the poorest of the poor. Those who suffer from problems like headache, seizures, weakness, hydrocephalus, head injuries, brain tumors, stroke, aneurysms, spine injury etc., come to Dr. Nandigama. With eyes filled with compassion, holding the pulse in his soft fingers, he patiently listens to every patient.

The busy doctor could spare some time for the interview but only after the last patient was gone. He narrated his success story that spins out of many failures.

Dr. Nandigama proved that poverty is not a hindrance to become a doctor.

Spirit Injected Childhood

"I was born in a small village called Madhava Rayani Gudem near Huzur Nagar in Nalgonda district. My parents are Mr.Guruvaiah and Mrs.Ramulamma who depended on agriculture for their livelihood. Despite social and economic constraints, my parents wished to see me as a doctor and that is how I am here," says Dr. Nandigama beginning his narration.

"Even when I was a child, my parents injected a positive spirit and prescribed the energy pills required for my studies," he adds. He is the only son among the four siblings. His parents determined to give them a good education, regardless of their hand to mouth income. He says that it is their grit that paved way for their education without breaks.

Boarding School at Bhongir

Dr. Nandigama did his primary education in a government school at his own village. Later, he learnt about the SWREI

Society's school at Bhongir. He took a test for admission into class V and got selected into it. Though his parents hesitated to send him to hostel, he was firm and unyielding for he felt the education in Society was good. He says, "I liked the hostel, utilized my time, worked hard and I got first class in SSC."

Dispelled the Fallacy

As the idea of going for doctor course was instilled into him by his parents, he says, he started working towards the goal. He took admission into Bi.PC at KRR Govt. Jr. College, Kodad in Nalgonda district. He says, "**The two targets that I had in mind were to pass Intermediate with flying colours and to achieve MBBS in open competition. I always wanted to dispel the fallacy that marginalized community students can't study well. The first target was successfully achieved. I was the college topper in Intermediate.**"

He dispelled the fallacy that the marginalized can't achieve without reservation.

Never Ending Effort

“The next target was awaiting its turn,” he adds, “but that was not that easy. There was nobody to guide me. I felt I was all alone in my journey, right from applying for EAMCET to pooling of resources to preparation to planning. I could not afford to go for long term coaching because I knew the financial constraints of my parents.” The best alternative was to take admission into graduation and he says he did that.

Dr. Nandigama spent sleepless nights owing to his passion for medicine. By convincing his parents, somehow, he went to Nellore for short term coaching but that did not work out. One more year was wasted. One day, he sat in loneliness and sorted out his strengths and weaknesses. His burning ambition for medicine made him delve into the depths of the subjects. He says, “I worked like never before. That is all. My dream came

true. I got medicine in Osmania Medical College, Hyderabad. It was one of the most cherished moments in my life. The ecstasy in my parents and family members was more than that was of mine.”

Up & Above MBBS...

He says, “My life in Osmania Medical College was never without struggle. For nine full years: 6 years for MBBS and 3 years for MS, I had to fight against all odds, financial problems on one side and great efforts for acquisition of language, knowledge and attitude on the other. Admission into MS (General Surgery) depended on the ranks.” He adds, “Library and my books were my world. My studiousness brought me first rank in the entrance examination for M.Ch at G.B.Panth Hospital, University of Delhi, New Delhi. After the successful completion of M.Ch, he went for “Skull base fellow” course in the international Neuroscience Institute, Hannover, Germany where again he proved his mettle in studies.

Never After Money

Dr. Nandigama says that he is quite content with his job, “**I could have gone for private practice to earn lacks of rupees and reputation. But that has never been my mission. My only mission is to come to the rescue of thousands of people who need free medical treatment and surgery. I think that is what I am doing and that is how I wish to pay back to the society I have come from.**”

He never gave scope to the idea that he was inferior to anyone.

He says his mission is not to earn but to serve the poor.

Mission in Life

During the entire span, he never once gave scope to the thought he was inferior to anyone. He proudly says, "It is not a matter which community you come from as long as you hard work. I got a job in Super Speciality Hospital and remember, nothing could prevent me from achieving what I wished to." He worked at G.B. Panth Hospital, New Delhi as a Sr. Resident Neurosurgeon. He is now an Assistant Professor in Gandhi Medical College/Hospital. He maintains, "I am proud to have performed surgery to as many as 3000 patients so far. I think I saved their life because they are so poor that they can't afford to go to private hospitals."

Dr.B. Nagender,
M.S.(General Surgery)
Professor & Head
Dept. of General Surgery
Osmania General Hospital Hyderabad.

"I am proud to be associated with Dr. Nandigama. I know him as an industrious student and now as a committed doctor. Despite his poor social and economic backdrop, he could become a doctor and an excellent doctor. He is simple and down to earth. He is very accommodative. He has every trait required for a good doctor. He spends a lot of time in the treatment of patients He takes a special care in the treatment of the poor."

Small & Happy Family

I am quite happy with my small family. My better half, Dr. E. Sujatha is also a doctor. She is an anaesthesiologist at ESI hospital in Sanath Nagar, Hyderabad. My two sons, Priyanshu and Ridhanshu are in elementary education.

A Word for Swaeroes

"I am happy that I am here in Gandhi Hospital because of my parents dream, my teachers' motivation. When I could prove as a small boy from tiny village with low socio economic background, what prevents you?" he questions every Swaero, "You are all blessed to have Dr.R.S. Praveen Kumar as your Secretary. Remember, "We are not inferior to anyone". ""

DANGEROUS DENGUE FEVER

What is it?

A mosquito borne tropical disease caused by the Dengue Virus. Also known as 'Break Bone Fever'.

What are its symptoms?

Fever, headache, muscle and joint pains, skin rash, abdominal pain, ongoing vomiting, liver enlargement, mucosal bleeding, high heamatocrit, lethargy or serosal effusions etc are the indications.

What are the different types?

- 1.Dengue hemorrhagic fever –results in bleeding and low levels of blood platelets and blood plasma leakage.
- 2.Dengue shock syndrome-dangerously low blood pressure occurs.

Which species of mosquito is it?

Several species of mosquitoes within the genus Aedes aegyptii (Tiger Mosquito)

When does it bite us?

Typically during the day, especially in the early morning and in the evening.

Dr.NRV Pavan Kumar,
Health Supervisor
TSWRS&Jr.College(B)
Husnabad

Who are the victims?

Humans are the primary host of the virus. Children and Old people are in the risk group.

How long does it take for transmission?

From 2 to 10 days from the date of bite. It is called incubation or febrile period.

How is it treated?

Using oral or intravenous rehydration.

Where do you find this dangerous species?

Over defunct tyres, old shoes, broken drums, drainages, dirty water etc.

What are the precautionary measures?

To cover the whole body with clothes, to use mosquito repellent creams or mosquito coils
To spray DDT, phenyl and other disinfectants in drainages and water stagnated areas.

SCHOOL LEADERS CONVENTION of TSWREIS

20th-22nd August, 2015

TSWREI Society hosted a three day **2nd ANNUAL SCHOOL LEADER CONVENTION** for their School Leaders (Principals & Special Officers) **from 20th August, to 22nd August, 2015. The mega event was inaugurated by Shri Kadiam Srihari, Hon'ble Dy. Chief Minister, Govt. of Telangana at 10 am on 20th August, 2015 at Telangana State Institute of Panchayath Raj and Rural Development (TSIPARD), Rajendra Nagar, Hyderabad.** Shri Raymond Peter, Principal Secretary to Govt. of Telangana, SC Development Department was the guest of honour.

The School Leaders of 173 institutions in all turned up to the convention. It includes 134 TSWREIS institutions, 39 KGBVs of TSWREIS institutions, from across the Telangana State who turned up for this eventful programme. The main objective of convention was to make all the School Leaders a role model through counseling and guidance on education and effective administration.

This three day convention had lectures on wide variety of topics such as Education Therapy, Child Protection, Aspirations of Marginalized Parents, Promoting Educational Technology, Communication & Life Skills, Best Practices, Ethics and Values etc. by eminent educationists and reputed speakers. The three day convention also threw light on various other educational issues and best administrative practices to be adopted by School Leaders in the present scenario.

The Speakers included Dr. J.S. Paranjyothi, Chairman, Oasis Educational Institutions, Ms. Sita Kiran, Principial and Regional Director, DAV public schools, Prof. Ramakrishna Swaero, HoD, IT, Sridevi Engineering College, Sunitha Krishnan, Founder, Prajwala, Dr. Geetha Chella, Director, Mano Jagruthi, an eminent Psychologist, Mr. John Wesley, KVPS, Mr.Y.A. Padmanabha Rao, Director, River Institute, Ms. Nandini Sood, CEO, Design for Change, Mr. Yuvan Seth, Alumnus, Riverside Institution, Mr. PVRK Murthy, Chairman, Sri Gayathri Institutions, Mr. V.Vishwanathan, Karadipath Education, Chennai, Prof. Paul Gunashekhar, Retd. Professor,EFLU, Ms. Parvathi Devi, Finance Officer, TSWREIS, Dr. Donas Richard, Christu Jayanthi College, Bangaluru.

The valedictory function was conducted on 22 August, 2015. The Hon'ble Minister for Finance and Civil Supplies, Govt. of Telanagana, Shri Etela Rajendar was the Chief Guest for the Valedictory function. Ms. G.D. Aruna, IAS, Principal Secretary, Tribal Welfare, Govt. of Telanagana was the guest of honour.

Dr. R. S. Praveen Kumar, IPS, Secretary, TSWREIS presided over the function. He explained the significance of this convention in the light of the changed circumstances and the dynamic role need to be played by the School Leaders. He thanked the ministers and other guests for sparing valuable time to grace the occasion.

MY SCHOOL

TSWRS/Jr. COLLEGE FOR GIRLS, SIRPUR, ADILABAD

K. Soujanya,
X Class

M. Manasa
X Class

Hi everyone!

Soujanya and Manasa welcome you to this column of **“MY SCHOOL”**. We are in X Standard. We are happy to come before you to speak about our institution.

Where are we?

Our School is situated in a tiny town named Sirpur. It is 30 km away from an industrial town of Kaghaznagar where paper is manufactured. You feel you are in the midst of forest, when you visit our institution. Within the vicinity, you find plenty of vegetation. In the midst of sprawling campus you find the big, colourful building. There are 16 sections right from Class V to Intermediate. At Intermediate level, we have Arts groups called HEC and CEC.

What different activities?

We proudly say that the face of every institution has drastically changed after Praveen sir has become our Secretary. He is instrumental in introducing a variety of programmes such as E-Plus Club, IGNITE, Voice 4 Girls, Karadipath, Summer Camps, Summer Samurai and Operation Einstein. Every one of these programmes proved successful with strict implementation.

How does our Prayer go?

Morning Prayer has been made lively in the last two years. We are proud that we have excellent prayer proceedings at our institution. After the class-wise reporting of attendance, we go for pledge and then chant 'Vandematharam', Telangana Song, National anthem one after another.

During prayer, news is read out by one student and then a General Knowledge question is asked by another. However, the answer is given with explanation where necessary. One proverb, one idiom are also introduced with explanation.

What is Brief Talk on?

Prayer is the time when children are fresh and any motivational talk done briefly has a great impact on children. One teacher from staff and then the principal speak on two different useful topics meant for motivating us. Our principal, with her good fluency and sweet voice attracts everyone's attention. The last part of prayer is birthday wishes.

What does School Council do?

Recently Elections are conducted in our school for a practical knowledge about vote, elections, democracy etc. We happily participated and the School Council was formed.

School Council 2015-16

What are these models?

The models shown in the picture are of “Human Body and Medicinal Plants”. The human body structure with stones is a special attraction on the campus. We planted all the medicinal plants which are useful to our body. It prompts us to take up plantation to save plants and environment. The model on the right is 'Akshara Vruksham' design.

What else do we have?

Our science lab is full of science materials. In the mathematics lab simplified charts of additions, subtractions and other numerals are there.

In sports, our friends performed well at national and state level competitions.

Class room activities: -

'Telanganaku Harithaharam' Programme was conducted on July 27, 2015.

What about the Staff?

We are extremely happy about our excellent staff and outstanding Principal. Our Principal received 'Best Principal Award' on the occasion of 15th August through the hands of Hon'ble Minister of Forest and BC Welfare Sri. Jogu Ramanna and the District Collector Sri. Jagan Mohan. It is a matter of pride for us that our principal was chosen by our beloved Secretary for delivering a lecture on Residential Pattern of Education at the Principals Workshop at Utnoor in Adilabad district.

Last but not least, our most beloved Secretary Praveen Sir's great dedication for Swaeroes brought twinkle in our eyes and the smiles on our faces.

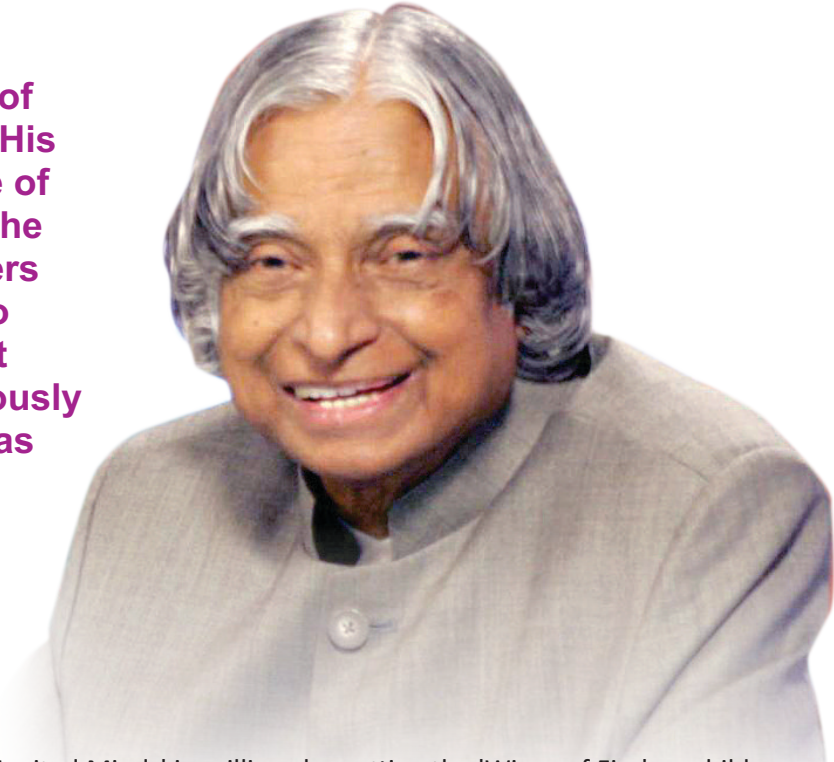

Independence day celebrations 2015 at our school

M. Sravani Selected for Rock Climbing Training at Darjeeling.

Kalam ke Salaam

Dr. A.P.J. Abdul Kalam is the pride of India. He is the darling of all hearts. His love for children, the ultimate future of India, put him in a special place in the Indian history. After freedom fighters generation, if there is anyone who attained the status of the topmost celebrity in India while being unanimously liked by the people of all ages, it was Abdul Kalam.

Kalamji's chat with children

Kalamji unveiling the Logo

As a man who 'Ignited Minds' in millions by putting the 'Wings of Fire' on children, envisioned the lives of millions of future citizens. You can call him Darling of Children, Man of Masses, 'Missile Man', the popular President of India and with whatever other name you wish to remember him; he endeared himself to all the people with his purity of heart and childlike sweet manners. Even as the grand President of India, leaving aside the protocol, that he spared most of his time and space for children himself voluminously speaks of his generosity and the love he bore for children.

And now, the TSWREI Society warmly recalls the cherishing moments of its bond with him since he was invited as a special guest to lay a foundation stone to one of the new school buildings in Hyderabad. He was the glitterati at the "INFINITY" celebrations of the SWR Society. While memories are still as fresh and as clear as a photograph in the minds of the SWR buddies, 'SWAEROES' journal puts an attempt to bring those hallowed moments live for the pleasure of its readers.

Though Kalamji left for divine abode, the great man's vision will live on, on and on.

Cultural troupes showcasing their talents at 'Infinity'

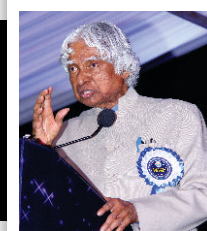

On Kalamji's visit to the SWR Society in 2013, our inquisitive students posed questions to him. He pleasantly replied. They are presented here for our present readers.

Our country has 1.1 crore population. But why only a few people are getting Nobel Prizes ?

Fantastic question Research, research, research...students in colleges and universities should be guided by research oriented experts. Then we'll definitely have many Nobel prizes.

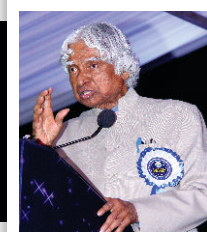

T. Jeevan Kumar, Karimnagar.

What was the most difficult phase of your career ?

It was my childhood in 1941. Everything was scarce. Mine was a joint family. My mother and grand mother managed the family well. They were hard times. I worked as a paper boy. I collected papers and circulated to all the people there.

K. Vijetha, Narmal.

The anchors in Kalamji's meeting were our own students. See what the delightful students say about the rare opportunity they got.

"I felt proud and excited for having met Dr.APJ Abdul Kalam while playing the role of Master of Ceremony in his presence. It's the first of the kind in my life, that too in English. I was able to manage it well. I'm still astonished at my own performance. It has given me immense confidence. I have the ability to anchor any programme now".

B. Aruna, Gowlidoddi.

"I had the wonderful privilege of compering at the INFINITY sermon. Dr. APJ Abdul Kalam walked upto me, admired my articulation and showered his blessings upon me, as I touched his feet. Compering in English was a thrilling experience. I had full control over the audience. I'll cherish this event all my life."

D. Pallavi, Mahendra Hills.

Kalam's Quotes

"A dream is not that which you see while sleeping, it is something that does not let you sleep."

"If you want to shine like a sun, first burn like a sun."

"Thinking should become your capital asset, no matter whatever ups and downs you come across in your life."

"Thinking should become your capital asset, no matter whatever ups and downs you come across in your life."

"Dreams is not what you see in sleep is the thing which doesn't let you sleep"

"One of the very important characteristics of a student is to question. Let the students ask questions."

"All birds find shelter during rain. But the eagle avoids the rain by flying above the clouds."

"Learning gives creativity, Creativity leads to thinking, Thinking provides knowledge Knowledge makes you great"

MATHS $\times - + =$

A sensible 'Scientific' approach for Success

- ▶ Success (S) is directly proportional to the product of Hardwork (H), Concentration (Co), Interest (I) and Studies (St).
- ▶ It is inversely proportional to using Cell phones (C) and watching Cinemas (C)

$$S \propto \frac{H(Co)I(St)}{C}$$

$$S = K \frac{H(Co)I(St)}{C^2}$$

K. Pradeep, II Bi.P.C.
TSWR (IIT-EAMCET LTCD) Jr. College
Gowlidoddi, R.R.Dist.

- ▶ Here "K" is support from Parents and Teachers.
- ▶ Every chemical reaction involves reactants and products.
- ▶ Similarly your studies and interest are the reactants and success is the memorable product.
- ▶ Hard work as a catalyst speeds up to achieve success.
- ▶ $\text{Studies} + \text{interest} \xrightarrow{\text{hardwork}} \text{success}$

$$1^2 = 1$$

$$11^2 = 121$$

$$111^2 = 12321$$

$$1111^2 = 1234321$$

$$11111^2 = 123454321$$

$$111111^2 = 12345654321$$

$$1111111^2 = 1234567654321$$

TSWRS Jr. College (G)
Elkathurthy . KNR

Special Numbers

- 0 is the Additive Identity
- 1 is the Multiplicative Identity
- 2 is the only Even Prime
- 6 is the Least Perfect Number
- 9 is the only Number which on Multiplication with any number gives the sum of digits of number as 9.
- Ex :- $9 \times 121 = 1089$ $1+0+8+9 = 18$ $1+8 = 9$
- 10 is the base of our number system.
- 16 is the only number that can be written in form $x^2 = y^2$ with x and y different integers i.e, $2^4 = 4^2 = 16$
- 18 is the only number which is twice the sum of its digits.
- 24 is the largest number which is divisible by all the numbers less than its square root.
- 25 is the smallest perfect square that can be written as sum of two squares

J. Pavan Kumar, Sr. MPC
TSWRS(IIT-LTCD) Jr.College,
Gowlidoddi.

THRILL-PUZZLE SUDOKU

History

Those who intuitively slip into the engaging grids of Sudoku, holding the multi-folded tabloid in one hand and a pen or pencil in the other know how excitingly brain teasing it could be. Almost for a decade, the game of Sudoku has become extremely popular all over. The game was originally called 'number place' and got published in New York by Dell magazines. It originated in Japan in the 1890's where it originally went by the name "Suji wa Dokushin ni Kagiru" which roughly means "the numbers must be single". The game later became known as Sudoku, "single number".

Rules of Sudoku

The popularity of Sudoku perhaps lies, partially in the simplicity of its rules. The basic Sudoku puzzle is a 9×9 (81 squares). The 9×9 grid is divided into 9 sub-grids, or "regions", which are 3×3 , that are obviously made up of 9 squares. The Sudoku puzzle starts with some of the 81 squares already containing a number. These numbers are called "givens". the goal of the game is simply to fill the puzzle so that every row, column and region contains the digits 1 to 9. There for each number from 1 to 9 only appears once in each of the "3 directions" (row, column, region). It's that simple. Try one for yourself.

P.Rajyalaxmi, TGT (Maths),
TSWRS/Jr. College,
Mahabubabad

SUNITHA

From Shaikpet to States

The United States-India Educational Foundation (USIEF) of the US offers training to the selected teachers from different countries for its Teaching Excellence and Achievement (TEA) Program every year. With an objective of providing international exposure, our Secretary has extended this opportunity to the TSWREI Society teachers. Mrs. Siramdas Sunitha, PGT Social Studies from Shaikpet stood in the frontline and grabbed this opportunity.

Let's know more about her selection.

Hearty congratulations, Ms. Sunitha. How do you feel about your selection for TEA?

I am thrilled to be selected for TEA. I think it is a great opportunity to learn more about new practices through the six week training programme in the US. I am grateful to the Secretary and all those who supported me.

How did you get to know about TEA?

It is an opportunity grabbed by our Secretary for us all. The government teachers with five years of experience are called for a screening test and interview. I am lucky to go through the process carefully and present the content to impress the US team. I am also happy with the way I am interviewed.

Great! What exactly was the selection process?

The application itself was designed in such a way that it reflects our personality as a teacher. Based on the Purpose of Letter, applications are screened. The selection process is usually done at two levels. One is TELP

(Test for English Language Proficiency) which is more or less like TOEFL in standards and the other is interview.

What was TELP like?

TELP tests the listening and reading skills of the candidates. Listening to English conversations and solving many on-line model papers helped me get through it. Interview at American Consulate Building is a memorable experience. The National Selection Board has six members. They posed questions based on what I had mentioned in my application. It is my self-confidence that helped me to do it well.

How did you go about the interview?

The interviewers were curious about my role in Karadipath. They were interested in Reading-WISE, MANA TV classes, lesson plans, mind-mapping techniques and my activities in teaching.

What challenges do you anticipate in American Classrooms? How would you tackle the challenges?

It's challenging to teach and interact with the native English speakers. I'm listening to you-tube lectures and watching American movies etc. to deal with the American students with ease.

Thank you, Sunitha. Hope your learning experience will be beneficial to our teachers and students to acquire global skills. Wish you All the Best.

Interviewed by

K.Rajitha, JL (Eng), TSWRMS/Jr. College, Madikonda, Warangal

Sasi the State Best

Ms. V. Sasi, the Trained Graduate Teacher (TGT) in Bio-Science from TSWRS/Jr. College Narsingi, of TSWREI Society, has been selected as a State Level Best Teacher by the government of Telangana

for the services rendered by her. She received the award through the hands of Hon'ble Deputy Chief Minister & Revenue Minister, Sri Mahamood Ali and Hon'ble Deputy C.M and Educational Minister, Sri Kadiyam Srihari, and Hon'ble Home Minister, Sri. N.Narsimha Reddy at Ravindra Bharathi in Hyderabad on 5th September 2015 on the eve of Teachers Day Celebrations.

Principal Secretary, Education Dept. Smt. Ranjeev R Acharya, IAS, Director School Education Sri. T.Chiranjeevulu, IAS, Commissioner &

Secretary, Board of Intermediate, Sri. A. Ashok, IAS, and Commissioner College & Tech, Education, Smt. A.Vani Prasad, IAS, were among the other officials present at the ceremonial celebrations.

Ms. Sasi has completed 28 years of service in the Society and worked round the clock for the welfare of marginalized students and for their educational progress. She achieved 100% results during the last 4 years and implemented all the programmes initiated by the Society.

Ms. Sasi who was seen in high spirits says, "As a teacher from TSWREI Society, I am proud to be one of the Best Teachers among the other awardees from government institutions. I dedicate this Award to my students who are constant source of inspiration. I am grateful to Secretary, to all the teachers for their support. The TSWREI Society's Secretary, Dr. R.S. Praveen Kumar, congratulated on her being awarded the State Level Best Teacher.

Dr. Sharada Swaero goes Global

The Society has added yet another feather into its 'Best-Teachers' Cap. Dr. Sharada, JL (Chemistry), Vice-Principal, TSWRS/Jr. College, Mallapur, Karimnagar, has been selected for the Global Teacher Role Model Award 2015. She was honoured at GLOBAL TEACHERS CONFERENCE-2015 held at Savarkar Auditorium in Bombay on the occasion of World Teachers Day on October 5, 2015.

She is the only teacher from the Society, from the entire State of Telangana to have received this award along with 28 others from across the nation. Apart from the 600 delegates from different states, there was a huge turn-out of delegates from abroad too. She shares her experiences with us. Let us talk to her.

What was your feeling when you received the Award?

It was a moment of great ecstasy to receive the prestigious Global Teacher Role Model Award 2015. It was an honour to take the Award through the hands of Padmsri Dr.Vijaya Kumar shah, Gold medal from former Governor of Arunachal Pradesh Sri.Matha Prasad ji and a memento from Prof.V.L. Dharukar.

What contribution of yours do you think brought you this award?

I have been the recipient of the best teacher Award in the State. My 20 years of modest experience as a Chemistry teacher, my innovative research in my subject, my way of enlightening the students, my punctuality and my commitment, I think, brought me this global award.

What was your research topic? In what way was it innovative?

Though I am a Chemistry lecturer, my love for Nature made me take up research in which microorganism and agricultural waste are used to produce an important enzyme called cellulose which is not only eco-friendly but also economically useful product. My contribution of articles to different newspapers on environmental issues and publication of 8 articles in the international journals got me

this award. I also scribbled a few poems on various social and environmental issues.

It has been near and dear to my students.

And your contribution in teaching?

In the classroom, I can't help without being innovative and experimental in my subject. Secondly, as a proficient speaker of English, I always insist on the students' need for attaining communication skills. I also throw light on various issues like stress management, personality traits, health and hygiene etc. I have

How do you feel as a Society teacher?

Having come from the oppressed community, I feel it a privilege to teach my own students. And now taking a cue from our Secretary, who is a leader and ladder of Swaeroes, I have tried to enlighten them in every possible way. Education is the only way through which Swaeroes can free themselves from backwardness. I have also received Dalit Ratna Award for my service to the community.

Kudos, Sharadaji! Kudos to your commitment! May you win many more awards in the days to come!

ఉపాధ్యాయ లోకానికి ఆదర్శంగా నిలుస్తున్న డాక్టర్ శారద

TSWREIS-NIRMAAN

Dear SWEAROES,

Nirmaan Vidya Help Line is here again now with **Special Class Railway Apprentices (SCRA)**, a course and a career.

- ▶ It is a unique sandwich training scheme for youngsters' professional training.
- ▶ Sandwich training means getting training while doing job
- ▶ Those who just completed their Intermediate (Plus 2) with Science are selected.
- ▶ The selected candidates are trained by Indian Railways at its own cost, to be graduate mechanical engineers.
- ▶ On successful completion of four years of apprenticeship, they are awarded Bachelor of Engineering degree in Mechanical Engineering.

How to pursue a course in Home Science?

- ◆ SCRA's are selected through the Union Public Service Commission (UPSC) Examination conducted every year. Notification is issued through website of UPSC around the month of October.
- ◆ The written examination is conducted in January. Candidates are shortlisted based on the performance in the examination. They appear for interview/personality test and medical examination normally conducted in May.
- ◆ The final merit list is issued in June. The SCRA's join sometime in July. Further details can be seen at the website of UPSC.

SCRA is a sandwich training course. The main components of this course are:

Academics: It's a 4 years degree course in B.E (Mechanical). SCRA's get practical training in engineering and management at Workshops. There are no summer and winter vacations in SCRA. Sports are compulsory and evaluated portion of the curriculum. Facilities exist for all sports and games. SCRA's form Student Clubs and participation in them is compulsory.

Part I : Written Examination carrying a maximum of 600 marks in the subjects as shown below

Paper	Subject	Code Number	Time Allowed	Maximum Marks
Paper-1	General Ability Test:- English, General Knowledge and Psychological Test	1	2 hours	200
Paper-2	Physical Sciences (Physics and Chemistry)	2	2 hours	200
Paper-3	Mathematics	3	2 hours	200
			Total	600
Part II	Personality Test carrying a maximum of 200 marks in respect of only those candidates who are declared qualified on the results of written examination.			

Notifications: The notifications are out in the months of February and the exam is in the month of July.

Age-Limit: 17-21 years on 1st August of the year of examination.

Boarding and Lodging: All SCRA's are lodged in Special Grade Hostel. The average expenditure of mess would be around Rs.4500/- to Rs. 6000/, which is easily manageable within the stipend.

Colleges that offer the course are:

- SCR Apprentices follow the four-year (8-semester) Mechanical Engineering Degree Course of Birla Institute of Technology Mesra, Ranchi.
- At the successful completion of their course they are awarded the regular BE (Mech) Degree of BIT Mesra.
- Employment Opportunities: Mostly in Railways as Junior Engineer:
- You are strongly advised to consider this course, as it will definitely provide them career of their choice. For any further information, you have the **Vidya Help Line to reach out to at 1800-425-2427**

Venkat Reddy
Senior Counsellor
Vidya HelpLine.

ESTHAR MADHULATHA

THE DS ACADEMIC THAT HAS BEEN

Ms. Esther Madhulatha is an officer par excellence. She is known as much for her commitment as for her sternness in looks. The long years of her experience in different positions, perhaps, brought toughness into her. But a tough administrator is more often a competent officer. One who believes in action needs to be tough indeed. Meekness and smiles tend to make one look like an inefficient at least in terms of getting the work done. But those who move very close with her can understand that at heart she is as soft as butter and that she is warm and lovely.

On the eve of superannuation of Ms. Esther Madhulatha as a Deputy Secretary on 30th September, 2015 after her lengthy voyage in the Society, I was prompted to interview her on behalf of SWAEROES journal.

1. Madam, please tell me about your long journey in the Society?

My journey in the society began in the year 1984, when I first reported to duty on 25th July 1984 as a Post Graduate Teacher. Within a month, I reported as In-charge Principal of SWR School for girls, Hyderabad where we had 80 students only from Class V to Class VIII with Telugu as the medium of instruction.

2. What were you before entering the Society?

Before joining the Society, I worked as a teacher in two different private schools. Later I taught Botany subject to the students of under-graduation at a degree college in Hyderabad.

3. What brought you to the Society?

Because it was government a job. Earlier, I had been working as a lecturer and expected to continue further in the same field.

4. What were your experiences as a principal?

It was the most unexpected situation when I landed as a principal, as these residential schools were started much before the Society was formed and there was no one to guide us. I had a tough time with some staff who are still working in the Society who would oppose everything. But I thank them as criticism has made me perfect and strong in all fields. Taking care of the students of Class V was the most challenging of all the jobs.

5. What were your responsibilities as Dy. Secretary and how did you go about them?

Holding the post of Dy. Secretary is very challenging, indeed. In the integrated AP, we had 300 odd number of schools including KGBVs. I had to cater to all the academic needs of 1.5 lakh students at various levels. Working 10 am to 5pm was never a complete day as I always had to put more hours to complete my work.

6. How you would like the Society to function and what changes did you find ever since Dr.R.S Praveen Kumar took reigns?

I would like the Society to function without many changes in an academic year. Certain things like the school timings, schedule of exams, holidays etc and certain other activities should be fixed, and should not be changed every year.

7. Any regrets?

Yes, after 31 years of establishing the residential system there is no channel created for promotions of principals. Every organization should allow the employees to grow. It is very unfortunate that the Society has never thought about it.

8. How would you like to spend post-retirement life?

I want to lead a peaceful life by going through all the books that I have been thinking of reading but could not do so because of my work pressure.

TSB

Seminar On English Medium Education

A seminar on the introduction of English medium in government schools at primary level was conducted by SC/ST Teachers Association of Nizamabad dist at Kamareddy on 30th August 2015. Dr RS Praveen Kumar, Secretary, TSWREIS, Sri Limbadri, Registrar Telangana University, Dr Paranjyothi, an eminent Educationist graced the occasion. The Secretary exhorted the teachers to set an example to others with their dedication and revive the glory of government institutions. He said, "Teachers should prepare the children for the coming techno age by updating themselves constantly so as to give right direction to the children." He wished the Swaeroes soar beyond infinity. Dr Limbadri urged the teachers to be the good models. He asked them to practice what they preach. Dr. Paranjyothi in his speech threw light on various academic issues.

Follow the Leader

Pawar's War against Poverty

He is yet another feather in the Society's cap. He is the son of a poor farmer living at Buggaram in Adilabad District. Buggaram is a small village which is just 5 km away from the graceful Kuntala waterfalls. Though he was born in Nature's lap, he hardly has any study environs at his village. Thus, bit by bit, working every bit, he rose to the topmost level in his studies. He has had to face acute financial problems during studies. His name is Dr. Subhash Pawar. He is a Technical Officer at the prominent Indian Institute of Chemical Technology (IICT), Tarnaka, Hyderabad.

Hi! Mr. Pawar, would you brief us about your background?

I am Dr. Subhash Pawar. I was born in a poor family in 1981 at an inaccessible village called Buggaram in Neradigonda mandal of Adilabad district. I am the youngest child of the seven siblings. My parents Lal Singh Pawar and Jami Bai do farming for livelihood.

You say that you are one of the seven siblings, what about their education?

My four sisters could not go beyond schooling and settled after marriage. My two elder brothers did graduation and went for B.Ed. but only through my constant pushing. One of them is now working as a teacher. Lack of exposure for studies made them settle low.

What about your schooling?

My schooling was done at Kuntala in Adilabad and at Utnoor, Adilabad. Both the schools were Tribal Welfare Ashram High Schools. Despite strong opposition from my father, I went to school and became the school topper with 68% marks.

Were you not a student who passed out of Society?

I was. I did my Intermediate in Social Welfare Residential Jr. College, Asifabad. The education standards here were beyond my capabilities. I opted for BPC as I was aspiring to be a doctor. But, with 57% of marks, I became the least scorer in the class and received punishment for scoring low. But this was a lesson to me, I should say.

But, what made you to go all the way to Bheemavaram?

One of my junior lecturers inspired me to go for Microbiology course in graduation as he said it had better prospects. Since there was no possibility of my going for medicine, I went for B. Sc. MLT (Medical Lab Technology) with combination of subjects like Microbiology, Biochemistry. This course was available only at Bheemavaram in West Godavari district where I also enjoyed free hostel facility.

What followed your graduation course?

Then, I did my post graduation in M.Sc. (Microbiology) at Kakatiya University, Warangal. Then I applied for my Ph.D but it is a long process. So meanwhile, instead of wasting time, I went for B.Ed. at Kothavalsa in Vijayanagaram dist. During M.Sc., I also went for Post Graduate Diploma in Computer Applications (PGDCA) privately for learning computer basics.

Great. Did you go for Ph.D?

Of course, I did. My admission into Ph.D was through entrance test. I also enjoyed the scholarship which I got from UGC-Rajiv Gandhi National Fellowship for four and successfully completed my Ph.D. I fully utilized the scholarship of Rs. 20,000 every month for advanced research in molecular techniques. Perhaps I am the only one who went up to Ph.D in our community from our village.

Well. Did you have to wait for your job?

No. Let me say that I did not waste a single year even during my studies despite the depressing situations. In 2010 May, I got the job at Institute of Microbial Technology (IMTECH), Chandigarh. Having worked there for 4 years, I was transferred to the prestigious Indian Institute of Chemical Technology (IICT), Hyderabad.

How is it that you are the only one well educated in your family?

I took failures easy. There was no 'Giving up', anywhere. During my studies, I always found out a way to meet my expenses, instead of depending on parents. During my graduation, I worked as a lab technician at Sharvani Diagnostics & Ex-Ray Clinic, Bheemavaram. During post graduation too, I worked in Life Line Hospital during nights. I gained practical knowledge and supported myself financially. I literally declared a war against poverty.

With parents

What about your family?

I got married in 2008 when I was in the second year of Ph.D. My wife is Sangeetha Rathod. She passed SSC at the time of my marriage. I supported her for studies. Now she is doing M.sc.Microbiology. Simultaneously, she is maintaining a lab in Hanamkonda. My children are small kids Rishika Pawar, Varun Pawar. I also love to express my thanks to my wife and children.

Any message to the budding Swaeroes?

Dear Swaeroes, we should not forget where we have come from. Dr.R.S.Praveen Kumar is a great reformer of our Society. His Swaero-Commandments teach us to be honest and self confident. Let us scrupulously follow them.

S. Dayakar, JL (Eng)
TSWRS/JC, Husnabad.

Prof S Ram Reddy (Retd.)
Dept. of Microbiology
Kakatiya University

Inspite of having come from the poor and marginalized community, Dr. Subhas Pawar has come up in life with grit and determination for education. With clear cut goals in mind, he puts relentless efforts for attaining the same. By reaching extreme heights in research, he proved that poverty and backwardness are never the barriers. I strongly believe that he will reach greater heights in the years to come. I wish him all the best.

Eloquent Speech Elegant Style

Badrinarayana from our Society has been a literal sensation in the recent past. He is as prodigious in his seamless gift of the gab as he is in his humour full of expressions. This wonder kid can easily attract everyone's attention not only with his elegantly stylish appearance, but also with his exceptional extempore speeches on the stages. For that matter, he was a literal celebrity at the IGNITE-2014 celebrations and at the three-day School Leaders Convention-2015. With his astonishing performance on the topic "How can you make our schools better?" at the Elocution competitions held on the occasion of IGNITE festival, he not only won first prize but also won the hearts of every one. And then at the School Leaders Convention, his 10 minute extempore speech on "Activities taken up in the Society" with full of twists in expressions and animations in gestures, he literally blew everyone's mind in the audience. Whether it is speaking in the Youth Parliament competitions, or in elocution competitions, or whether it is as a Teaching Assistant or even as a Super Student, he has become a superman in the Society.

With all his brilliance, this ward is a student of TSWR Magnet School, Chilkoor just studying in VII standard. This ward appears to possess ample chances to be a successful compeer in the course of time. Let us wish him all the best.

TSB

Bless the Budding Cricketers

We are aware that the aim of TSWREI Society is not for academics alone but the all-round development of the children. To achieve this many innovative activities are being implemented besides conducting a number of summer camps. A recent addition to this is CRICKET.

Mittapally school in Medak district is a pioneer in cricket coaching. With the coaching of Siddipet Cricket Association and the cooperation of HCA, Mittapally students participated in a cricket tournament at Hyderabad. Sangeetha, right hand medium fast bowler was selected for Telangana state team and participated in South Zone U16 women tournament at Bangalore. Encouraged by this 40 students were selected from all the districts. They played at Hyderabad Club's Zonal tournament. Rangishetty Sunitha and Malavath Poorna were selected for the State team. R. Sunitha, fast bowler from Tekulapally School in Khammam district participated U19 South Zone tournament at Bangalore..

An inter district U19 tournament was conducted at Medak from 20/9/2015 to 26/9/2015 after a 10 days coaching camp at Mittapally. Karimnagar team was the winner and Nalgonda was the runner. 1st runner was Nizamabad and 2nd runner was Medak.

Out of 150 players from 10 districts, 30 probable players were selected from this tournament. They will stay at Mahendrahills School and will be given coaching at gymkhana grounds by expert coaches.

So after EVEREST, the swaroos are going to rock the Cricket ground.

ALL THE BEST BUDDIES.

National Day of Service and Remembrance

The students and the staff at TSWRS/Jr.College, Gowlidoddi warmly received the officials from the US Consulate General, Hyderabad who visited their institution on 19th September, 2015 in order to commemorate the 3000 victims who were killed on 11th September 2001 in the USA.

The programme named as "National Day of Service and Remembrance" was observed to prove-"the power of those who seek to harm and to destroy is never greater than the power of those who seek to persevere and to build". The officers interacted with the school students and organized events such as games, storytelling, singing and painting. Young painters affiliated to 'The Social Artist'- and 12 MBA student volunteers from the University of Hyderabad assisted the officers in engaging the students

The artists along with students painted murals on the walls of the school. Photo exhibition highlighted all the flagship programme of the Society. The students very enthusiastically participated in every one of the activities. The consulate officials were seen off with the guard of honour and placards were displayed on which "Good Bye" in 10 different foreign languages was written.

MALAVATH POORNA IN THE UN MEET

Our Mt. Everest celebrity, Malavath Poorna is once again in the limelight. She was proudly selected by the Delhi based NINE IS MINE organization as one among the delegation of 15 child-advocates and 5 adult child rights activists who was there at the 70th United Nations General Assembly in New York in September 2015. The organization called for action on the proposed Sustainable Development Goals (SDGs). It engaged children with disabilities and children from tribal and Dalit backdrop and took them to the UN in their attempt to End Poverty.

The following is an exclusive interview with Malavath Poorna which tries to explore her experiences during her visit to the UN General Assembly.

How did you get this opportunity to go to the UN General Assembly?

As I scaled Mt. Everest at a very young age, NINE IS MINE organization invited me to be part of the UN General Assembly programme. Our Secretary Dr.R.S.Praveen Kumar encouraged me to be the part of this programme for which I am grateful to him.

Where did the UN General Assembly meeting take place? How did you enjoy the trip?

The UN General Assembly took place in New York almost for 8 days and I participated in different activities. Every moment was memorable experience for me.

What did you do there?

I was an active participant among the 20 participants from India. All the 20 were child prodigies from different corners of the country participated in the discussions on problems like the child brides and the child-deaths due to poverty in the world.

What was your role in the UN General Assembly?

I spoke on the issue of equal rights for girl children. It was a thrilling experience for me to get an opportunity to speak in the UNICEF.

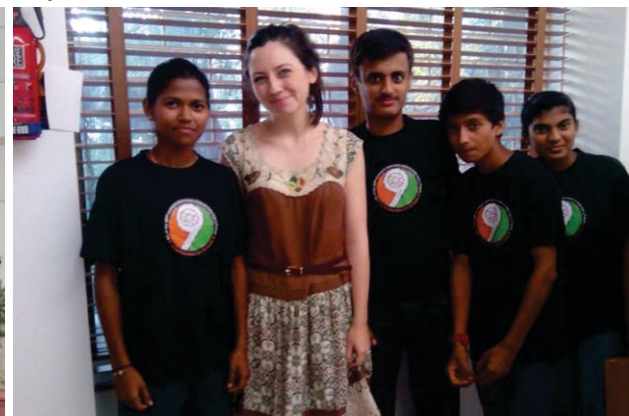

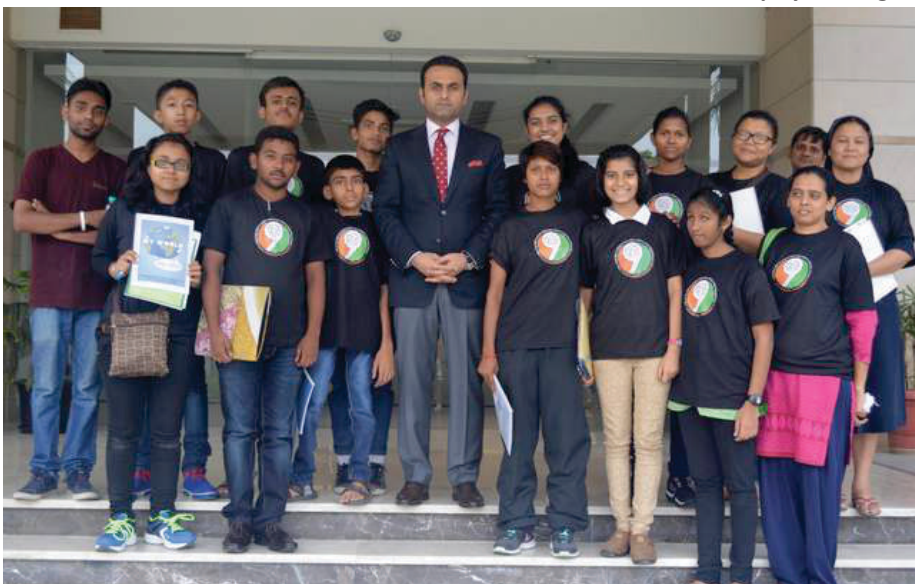

When did you leave and where did you stay in New York?

We left Delhi for the UN Summit on 18th September, 2015. We were given accommodation at the Iona College in New Rochelle.

When did you get back to India?

We flew back to India on 28th September, 2015 and on the same day to Hyderabad by another flight.

Great. Hope you will get many more chances to visit abroad.

స్రీమదు వినాయ

From darkness to light

This is a story of a rich family that lived happily. The family has two girls Sanjana, Sahaja, and a boy Shashank. But, on one cruelest day, the parents met with an accident and all the three children became orphans. Their cunning relatives had an eye on their property and took it from them by force. The three children's life became miserable.

Sanjana was the eldest. She was in Intermediate. She took the responsibility of her sister Sahaja and brother Shashank. She chose a part-time job in a hotel and managed to send her sister and brother to school. People appreciated Sanjana's bravery in facing life and in working hard for brother and sister.

Gradually the youngsters turned out to be very lazy. When Sahaja and Shashank were negligent about their studies, Sanjana first warned, and then counseled them reminding their parents.

On one fine morning, fortunately, she came to know about the Telangana Social Welfare Schools. She made them write the test and joined in one of the schools. They had no trouble now. They continued their education stood first in every activity.

Ten years passed. What do you think they are doing now? Sanjana became a bank officer, Sahaja a gynecologist and Shashank an IPS officer. They always kept their parents in their heart. They opened an Orphanage in the name of their parents.

Hats off to the spirit shown by Sanjana and her siblings!

K. Supriya, X A,
TSWRS/Jr.College (G),
Thorrur, Warangal.

పాటలతో పాఠం

ఈ అమ్మాయి పేరు డి.స్వరూప. కస్తూరిబా గాంధీ విద్యాలయం భీమిని, ఆదిలాబాద్ జిల్లా లో 9వ తరగతి చదువుతుంది. అమ్మ వార్లబాయ్, నాన్న దామాజీ. లుంబిని నగర్ గ్రామం బెజ్జూర్ మండలం. నేపథ్యం అతి పేద కుటుంబం. కాని సూపర్ స్టూడెంట్ గా మన టీవీలో 22-09-2015 రోజున తెలుగు పాఠం చెప్పి ఒక చిన్న సంచలనమే సృష్టించిందని చెప్పవచ్చు. ఒక తెలుగు పాఠాన్ని ఎన్నుకొని, అందులో పద్యభాగాన్ని తీసికొని, వలసకూలీల బాధలను తెల్పాతూ గేయరూపంలో వున్న 9వ తరగతి పాఠాన్ని రాగయుక్తంగా పాడుతూ వలస కూలీల బాధలని కళ్ళకు కట్టినట్టు చూపించి అందరి మనసులను అలరించింది. చక్కని కంఠం, చిక్కని మాటలు ఆ పాఠాన్ని పరిపూర్ణం చేసాయి. అయితే ఇలా రాగయుక్తంగా పాఠం చెప్పడం వల్లనే అవకాశం వచ్చిందని, మొదట్లో కొంచం బెరుకుగా అనిపించినా రాను రాను చక్కగా చెప్పగలిగాను అని సంబరపడి పోయింది ఆ అమ్మాయి. మెంటార్ టీచర్ చిప్పకుర్తి శారద కూడా గాయకురాలు అవటం వల్ల పాఠం చక్కని పాట అయ్యింది. ఇంతకే ఆ అమ్మాయి మాతృభాష తెలుగు అనుకుంటే మీరు పొరపడినట్లే. ఆదిలాబాద్ జిల్లాలోనే పుట్టినప్పటికీ ఆ అమ్మాయి మాతృభాష మాత్రం మరాఠీ. ఇట్లాంటి గొప్ప కార్యక్రమాలను మాకు దగ్గర చేస్తున్న సెక్రెటరీగారు ప్రవీణ్ సారుకు, స్పెషల్ ఆఫీసర్ చలపతి సారుకు కృతజ్ఞతలు అంటుంది స్వరూప.

CHAT WITH RAJU SWAERO

NO REVERSE GEARS FOR RAJU SWAERO

He is a brilliant student of class IX studying at Centre of Excellence (COE) Karimnagar. He hails from a small village, Bommakal of Saidapur mandal in Karimnagar district. His parents are detestably poor. He doesn't have a penny to buy books and read them. He had no idea of what a good book consists of let alone the art of writing. The only books he has had are the text books meant for his studies. But, just when "Swaero-authors" competition-2014 was announced by the Society, he skimmed through a few books in the library and craftily connected his own life story putting his mind and soul. That's all! Within a few of months of time, from his pen flowed 'Jeevithachakram'. It won him the first prize and more than that a good name.

But a heart rending story follows this prodigy. Quite for some time, he has been suffering from serious ailment that literally confined him to bed. He was hospitalized for a long time but now gradually recovering himself. For all the games played by life, this wonder kid has only one answer-"NO REVERS GEARS."

One of our contributors, Ms. Indira Swarajyam has a freewheeling chat with this prospective writer Master Raju Swaero. Let us follow them.

Indira: Congratulations, Raju. What was your immediate reaction after the announcement of the prize?

Raju: Thank you madam. My happiness knew no bounds. I jumped first and instantly shared it with my intimates.

Indira: What inspired you to be part of Swaero-authors competition?

Raju: Well, I never tried to scribble any story earlier. But the competition prompted me to read several story books as if to get some clues for writing. During summer, I was free and therefore attempted to write. Some of my friends even made fun of me. But I did not give up.

Indira: How did you plan for writing?

Raju: In fact, there was no planning. The knowledge after reading several books was used by me to write about my own experiences and incidents in my life.

Raju with his mother, to the left is the interviewer

Indira: Did you have any idea that you would be getting prize?

Raju: Absolutely no idea. Though I was not confident of getting prize, my intention was to be recognized as a writer.

Indira: Which writer is your role model? Whose inspiration worked on you?

Raju: I have no role model writer because I haven't read much. I haven't even heard of any author prior to this competition.

Indira: Who was your mentor for the competition?

Raju: I didn't choose any one as a mentor for my writing. Once I got to know about the competition, I made up my mind to write. But my Hindi teacher, Mr. Kishore asked me write it with passion making it as realistic as possible.

Indira: How did you feel about this opportunity you got?

Raju: I must be very grateful to our beloved Praveen Kumar sir. Initially, I used to get frustrated with the programmes in the schools but later on I realised the usefulness of them. Then on I started participating in the activities with enthusiasm.

Indira: What was your feeling when you received the cash reward and memento?

Though I could not make it to Swaero-authors celebrations, I felt delighted, encouraged when Secretary sir and my swaero-authors friends and teachers visited me to give the reward and memento.

Indira: Could you tell me about your family background?

Raju: I am from a family with no financial certainty. My father is Kumara Swamy and mother is Poola. Both of them are daily wage labourers. I have a younger brother, Bhanu Prasad studying in class VII at TSWRS, Koheda. From V to class VIII, I studied in TSWRS, Husnabad. For IX class, I wrote a test and got selected for Centre of Excellence (COE) at Karimnagar.

Indira: How and when was this sickness which you are suffering from identified?

Raju: I suffered from typhoid several times continuously and tumours appeared around my neck. I was first hospitalized for treatment in MGM hospital, Warangal. The doctors conducted a series of tests and diagnosed blood cancer. I was then shifted to MNJ Hospital, Masab Tank.

Indira: How is the treatment going on?

Raju: I have got a good treatment. Praveen Kumar sir is extending his full support both financially and morally and scrupulously following up the treatment. Through his love and generosity I have recovered fast. I am quite confident that I can overcome this problem with everyone's support and prayers.

Indira: What would you like to become in future?

Raju: Initially my intention was to become an IPS officer. But now that I am severely affected by cancer and recovering fast, I wish to go for medicine course to become a good doctor. Dear lovely child, May God bless you! May you recover fast! May you have the blessings of all!

Readers Mail

I have no words to express my happiness when the beloved Chief Minister came to our college and shook hands with me. I am from Chintamadaka, which is also the native place of our CM. He affectionately enquired about me. He appreciated me for my fluency in English and for participation in Super students programme. I thank Swaeroes magazine for my photo with the CM on the cover page.

P, Shruthi, II MPC,
Mittapally, Medak

I regularly read the Swaeroes magazine. I am happy to see our Chief Minister Sir on the cover page, we are very thankful to him as he has recognized Swaeroes talents. I have read the "Reaching for the moon" cover story and felt happy to see the success of many Swaeroes. Interview with Boda Usha Rani is interesting. We thank you all.

B. Seetharavamma, X B
TSWR School (G), Mulakalapalli, Khammam

The last issue has come out nicely. The news of Swaeroes getting admission into IITs and medical colleges is really an inspiration for us. Sunder Raju's participation in international yoga competition is really great achievement. If there was no Swaeroes magazine, we would not know anything about these things. Thanks to Secretary Sir and the team of editors.

B. Sunder Shyam, II MPC
TSWRS/Jr.College, Dammamet

The life story of Jayasheela madam "Oka Swaero Hrudayasandana" is amazingly inspiring.

K. Deepthi, X Class
TSWRS Chinnabonala, Karimnagar district

"Inspiration is like bathing; it's effective; but, only for a short period of time; that's why, we recommend it every day" reads a Zig Zaglar.

I find SWAEROS a good read because it has all the aspects that contribute to raise the not just the level of inspiration but also of knowledge, culture and team building. To add to it, Space is effectively managed and information caters to both students and teachers' knowledge/ skill/ confidence building.

Kudos and three cheers to the team for coming up with such good reads!

Bhanumathi.S, South Zone Coordinator,
Design for Change

Secretary Speaks..))))

Dear Swaeroes,

Welcome back after a long, but well deserved vacation. I am sure you must have met all your friends and relatives and shared your excitement of being a Swaero. I too visited village to see my mother and little swaeroes in the surrounding villages as a part of Quest. The moment I entered into my home I was mobbed by around 20 parents. Some of them were eager to share the transformation in their kids after they joined our schools and the rest was pleading to see that their kids also join our social welfare residential schools. A few youth approached me whether they can also form a Swaero committee in their village. You can see now, we are emerging as a brand everywhere. But remember, this is a huge responsibility. Our life should be our message wherever we go.

I am happy that 90% of the principals took part in Quest in this vacation. I thank them profusely for this effort. When I visited the homes of our students, I found them busy doing their projects and parents were helping them by switching off the TVs and procuring notebooks and news papers for kids. This is what responsible parenting is all about. Since vacation coincided with birthday of our founder, SR Sankaran, we celebrated his birthday on October 22 in the midst of all villagers.

As some of you are aware, I have been out of office on mid-career training to National Police Academy and London for five weeks. I thank Dr MV Reddy, IAS and every staff member for continuing all the programmes in my absence. Training at NPA was a dream-come-true moment for me as I could meet about 70 senior police officers from all over the country and abroad with varied experience. In London I met quite a few Swaeroes who are doing very well there. For example, I was the guest of Dr. Poshan Swaero who is a leading Paediatric Surgeon in NHS of Leicester City. To top it up, journey to London in Boeing 787 Dream liner jet was so exciting and I felt like I was moving in a flying royal palace. The cost of each jet, I was told, is whopping Rs.1400 Crores! Roughly 35 years ago, moving on rented bicycle itself was a great luxury for me while I was studying in SW hostels. Given the hard work you have been doing for the last four years, I have no doubt that you all would get this opportunity sooner or later.

I thank all the teachers in physical education department and engineering wing for making zonal sports meet a grand success. I am sure you are all bracing up for the busy competitive and fun-filled season. There are many exciting programmes like Ignite, Explore, Horizon, Cosmos-2015, State Sports Meet, and Wisdom of the Week lined up for you. We are leaving no stone unturned to bring innovation into our classrooms. Introduction of Flying Squads, Test and Teach, Meet My Mentor, Aptitude Test, Learning by Teaching, and Critical Thinker Program are some of these innovations that will bring us closer to 21st Century job market. Hope you will enjoy every bit of this quality revolution.

Lastly, I sincerely thank our honourable CM, Sri KCR for giving us the additional responsibility of transplanting our spirit in our sibling, Tribal Welfare Gurukulam as well.

Go Swaeroes. Go Cosmos.

Yours in Mission,

Dr. Praveen Kumar R Swaero
Secretary
